

3. Click the Change File Location Icon and browse to your desired location for AFR file storage. Brentmark recommends that you use either of these two folder locations:

C:\Documents and Settings\%User Name%\Documents\Brentmark\AFR

or

C:\Documents and Settings\%User Name%\Documents\Brentmark

Notes:

1. You can manually enter the folder path as an alternative to browsing to the path. You can paste the recommended locations above, but be sure to substitute the user profile name. Also be sure that there is an AFR subfolder in the *Documents\Brentmark* folder.
2. Future versions of Brentmark Programs will have an AFR manager feature to create a folder at the recommended default location.
3. Network users may prefer to store the AFR files on a server for shared use. If so, then the user AFR location must be set to point to that shared location.
4. System administrators may prefer to set the location of the AFR files using registry settings. If so the value for *STRING_PATH* under the *HKEY_CURRENT_USER\SOFTWARE\Brentmark\AFR* key should be set to the file location.
5. Sometimes network security prevents desktop programs from accessing the internet. This will prevent Brentmark programs from downloading the AFR files. In such situations, the AFR file can be manually downloaded and saved in the AFR folder location.
The AFR file may be downloaded at <http://www.brentmark.com/AFRdownload.htm> (where you will right click the link and choose *Save target as... or Save Link As...*): www.brentmark.com/afr.xml
